SUMMARY

Swinburne Computer Science graduate (Data Science & Software Development) with hands-on experience building data dashboards, analytics pipelines, and web applications. Delivered analytics tools for KPMG audit teams, designed relational database schemas, and developed interactive data visualisations on real-world government datasets using Python, KNIME, and Chart.js. Led Agile teams as Scrum Master across 8 sprints, translating technical solutions for non-technical stakeholders. AWS Certified Cloud Practitioner with experience deploying on AWS and Azure.

EDUCATION

Swinburne University of Technology

Melbourne, Victoria

Bachelor of Computer Science

June 2023 – June 2026

- **Concentrations:** Software Development & Data Science
- **Relevant Coursework:** Data Visualisation, Big Data Architecture, Cloud Computing, Machine Learning, Database Systems, Software Architecture, Data Structures and Patterns, Object Oriented Programming.

EXPERIENCE

Swinburne University

Melbourne, Victoria

Lead Developer — DC Prototype (AML/CTF Blockchain Network)

Aug 2025– June 2026

- Architected a 4-organisation Hyperledger Fabric private blockchain simulating an Australian financial consortium
- Wrote smart contract logic (chaincode) for automated AML/CTF risk scoring with 7 detection rules
- Built Node.js REST API with Keycloak OAuth 2.0 SSO and React.js dashboards for 5 user roles
- Containerized full stack with Docker Compose; delivered APRA/AML/CTF regulatory alignment report
- Team Lead & Scrum Master — managed 5-person team across 10 months, 5 sprints; sole client stakeholder contact

Swinburne University

Melbourne, Victoria

Full-Stack Developer — Digital Career Hub

Jan 2026– June 2026

- Built career platform with React.js, Node.js, PostgreSQL; 5-role RBAC admin system, full CRUD APIs, 7-table schema with JSONB fields
- Scrum Master — facilitated sprint planning, retrospectives, and stakeholder demos for 6-person team

KPMG

Port Louis, Mauritius

Software Development Intern

Nov 2024 – Feb 2025

- Built and tested 5+ RESTful APIs with Node.js and MongoDB, handling 1,000+ daily requests in 2-week Agile sprints
- Developed 3 React.js dashboard modules (data tables, filters, CSV export) used by internal audit teams of 10+ users
- Created UI prototypes in Figma, reducing design-to-development handoff time by 30%
- Conducted code reviews and managed Git workflows in a 4-person development team

PROJECTS

Road Safety Enforcement Dashboard

Jan 2025 – July 2025

- Built interactive analytics dashboard on Australian government road safety data (BITRE) using KNIME for ETL, Python for processing, Chart.js and Leaflet.js for visualisation — delivering geographic, demographic, and time-series insights for policymakers and law enforcement across 4,500+ records spanning drug testing, speeding, fines, and mobile phone offences.

Shift Ready

Aug 2024 – March 2025

- Built a multi-tenant B2B SaaS platform with 3 user roles and real-time AI training content by engineering a React + Supabase stack with Groq LLM integration and automated email workflows
- Reduced retail staff onboarding time by developing an AI quiz and simulation engine generating store-specific content using llama-3.3-70b and a manager-controlled approval system

ACTIVITIES AND LEADERSHIP

Swinburne Volunteer Society

2023 – 2026

Helpdesk assistant for Software Development course; led digital literacy workshops for 30+ participants

Duke of Edinburgh Award

2017–2020

Completed Bronze & Silver; led 4-person team through 3-day hiking expedition with route planning, risk assessment, and navigation

SKILLS

Programming: Python, JavaScript (ES6+), SQL, Java, Kotlin, HTML/CSS, Node.js, React.js, KNIME, Chart.js, Leaflet.js

Tools: Docker, AWS (Certified Cloud Practitioner), Azure, Git, GitHub Actions, Jira, Figma, Power BI, Keycloak, Jupyter Notebooks, Express.js, FastAPI, Flask, Pandas, NumPy, Scikit-learn, Hyperledger Fabric, PostgreSQL, MongoDB, MySQL, Supabase, Agile/Scrum
